

## PROVO CENTER STREET NORTHBOUND RAMP CLOSURE

Beginning as early as mid-April, the northbound on- and off-ramps at Provo Center Street are scheduled to close for up to 40 days each. One ramp will close at a time to allow crews to construct the new northbound lanes and ramp connections at the interchange. Work activities will include grading, asphalt and concrete paving and cure time, and lane striping. Motorists can use University Avenue or University Parkway as alternate access points to and from northbound I-15 during these closures.

The southbound ramps and east-west access along Center Street will remain open.
